

# Marine Based Engineering Level 2

16-19

Adult

If the possibility of a career in the marine sector – filled with challenges, job satisfaction and travel appeals to you, then maybe you should consider studying to become a marine based engineer.

The course is predominantly a practical based programme. Focusing on giving learners the ability to service and maintain a wide variety of marine in board and outboard engines, alongside the propulsion systems commonly found in most marine vessels.

The workshop at Falmouth marine school is one of the largest marine specific training areas in the U.K, alongside a wide variety of specialist tools to perform maintenance and diagnostic processes on our industry endorsed equipment.

At level two, the course is focused around servicing and maintaining of marine mechanical systems, components and also covers engineering environmental awareness, techniques and principles. Successful completion of this programme will allow learners to progress onto the marine based engineering level three course.

Choosing to study at Falmouth marine school will mean that you will be joining a college with 100 years of training and supporting the marine industry and learning from industry experts to give you the best start to your future career.
