

Marine Biology & Ecology

16-19

Adult

Careers in Ecological Conservation and Habitat Management offer rewarding opportunities to protect and restore vital ecosystems, with marine and coastal environments being some of our most critical natural systems. Whether your passion lies in managing delicate coastal wetlands, studying ecosystem interactions between marine species, monitoring habitat health through biodiversity surveys, or developing conservation strategies for threatened marine communities, this course provides essential foundations for your future.

The Marine Biology & Ecology Level 3 course at Falmouth Marine School draws on decades of expertise in ecosystem management and conservation science. Our specialist equipment and facilities enable hands-on experience in habitat assessment, species monitoring, and ecological surveying techniques. Our unique resources are unmatched at college level across the UK.

Students gain practical experience across diverse learning environments - from conducting ecological surveys at sea, to analysing ecosystem health in our laboratories, to managing controlled aquatic environments in our wet lab facilities. This comprehensive approach to ecological study offers exceptional preparation for those seeking to make meaningful contributions to marine habitat conservation and ecosystem management.
